CLEAN technologies presents:

The Status of Clean Technologies

A Symposium of Ten Seminar Offerings to Hi-lite:
Alberta's Clean Technologies and Advance their Commercialization

Public interest in climate change and energy, the economy and the environment have prompted considerable innovation and enterprise for commercializing clean technologies and sustainable communities. (whether the results of Copenhagen will contribute to fusing or fragmenting, frustrating or financing, the various initiatives, we'll know better in the coming weeks). The Alberta Council of Technologies and the AB Chapter—Canadian Green Building Council, propose the following forums for the purpose of helping define the status of clean technologies in Alberta and advancing their commercialization.

EVENT PROGRAM
