

**New Executive Director for the
Edmonton Neighbourhood Watch Program Society.**

Paul J. Lepine, CHRP, has taken over these responsibilities and looks forward to further developing the partnership already in place with the EFCL and Community Leagues. The Edmonton Neighbourhood Watch Program Society (ENW) has verified that they are available to the EFCL, Area Councils and individual community leagues to provide information and make presentations as required. These presentations will provide information on the Society's mandate, training availability and goals that both organizations together endeavour to achieve.

“

Providing information, security concerns, community safety and community involvement is a prime goal of the ENW. These goals fall hand-in-hand with community league objectives and I look forward to further developing the partnership between all community leagues and the ENW.

I invite the Area Councils and individual Community Leagues to contact the ENW should a presentation be required or to inquire into what type of presentation can be presented to your particular community league. I strongly feel this is a win-win situation for both organizations and encourage you to pursue this invitation.

In community spirit.

“

Paul J. Lepine, CHRP
